WATER FOREVER: DIRECTIONS FOR OUR WATER FUTURE DRAFT PLAN

LandCorp wishes to congratulate Water Corporation for providing a well considered long-term plan to secure our water future.

LandCorp supports all of the proposed actions and would also encourage Water Corporation to seek new business models to further secure our water future.

LandCorp feels the plan would be enhanced by consideration of:

- utilising treated waste water (black and grey water) and storm water within the home, especially in gardens, toilet and (cold) laundry water provision; and
- exploration of decentralised solutions which would also allow Water Corporation to reduce ecological impact and achieve greater energy efficiencies.

Yours sincerely

Barton Williams
